EDUCATION

University of Sheffield

Sheffield, UK

MSc, Statistics with Medical Applications, Grade: Merit

September 2022 – September 2024

- Modules in time series, Bayesian statistics, medical statistics, machine learning, and health-economic modelling
- Dissertation: A Network Meta-Analysis of Treatments of Locally Advanced/Metastatic Pancreatic Cancer

University of York

York, UK

MMath (Hons), Mathematics, Grade: 2:1

October 2018 – June 2022

- Key modules included statistical pattern recognition, applied data science in R, and Bayesian statistics
- Dissertation: Statistical Methods for Resetting Score Targets in Limited-Overs Cricket
- Received full colours for representing the university at cricket during my undergraduate studies

EXPERIENCE

Biostatistics Manager

April 2026 – Present

Astellas Pharma

York, UK

- **Statistician in the medical affairs statistics group**
- Co-lead of a research group on indirect treatment-comparisons
- **Study-level statistician for a women's health compound**
- Designed and generated TLF specifications for a large phase IV longitudinal study
- Study statistician for a phase IV study in Canada
- Planned, conducted and delivered an indirect treatment-comparison using population adjustment methods
- **Study-level statistician for a novel oncology compound**
- Contributed to integrated evidence generation planning

Associate Biostatistics Manager

December 2024 – March 2026

Astellas Pharma

York, UK

- Spent ten months in clinical development, working on phase 1 trials for two novel oncology compounds
- Spent six months in the medical affairs statistics group, working on a women's health compound

Senior Statistical Analyst

April 2024 – November 2024

OPEN Health Evidence and Access

London, UK

- Lead the survival analysis workstream for a large clinical trial in chronic-lymphocytic leukemia
- Supported the delivery of a network meta-analysis in crohn's disease for a NICE submission
- Conducted a non-proportional-hazards network meta analysis in ulcerative colitis
- Lead an indirect treatment comparison in crohn's disease for the Australian HTA body
- Implemented a novel survival modelling technique into a health-economic model
- Lead the development of in-house R packages for survival analysis and network meta-analysis

Statistical Analyst

June 2022 – March 2024

OPEN Health Evidence and Access

York, UK

- Worked on building and maintaining in-house R packages for survival analysis
- Performed and reported on the survival analyses of four clinical trials for submissions to health technology assessment agencies
- Performed a network meta-analysis in multiple myeloma
- Wrote statistical analysis plans for trial analyses and network meta-analyses

PUBLICATIONS

MSR48 Discrete-Event Simulation Model Projects Economic Outcomes Associated with Long-Term Clinical Remission in Patients with Severe Asthma Receiving Mepolizumab, Value in Health, Volume 28, Issue 6, S283 (July 2025)

Discrete Event-Simulation Model Projects Mepolizumab Treatment Outcomes Associated With Long-Term Clinical Remission in Severe Asthma, American Journal of Respiratory and Critical Care Medicine, Issue 211 (May 2025)

MSR213 Comparative Efficacy of Treatments in Advanced/Metastatic Pancreatic Cancer: Demonstrating the Power of Multi-Level Network Meta Regression, Value in Health, Volume 27, Issue 12, S2 (December 2024)

INVITED TALKS

A Network Meta-Analysis of Insulin-Adjunctive Therapies in Type 1 Diabetes Mellitus in Children and Adolescents, Royal College of Paediatrics and Child Health Conference 2026, Birmingham UK (May 2026)

SKILLS

Soft Skills: Project management, communication, resource allocation

Programming Languages: R, Python, C/C++, Stan, SAS

Developer Tools: Git, Vim, VS Code, Rstudio Server, Rstudio Desktop

Communicative Languages: English, Norwegian

Presenting: Experienced at creating and giving talks/presentations in both Beamer and PowerPoint

Misc: Excel, VBA, PowerBI, RShiny, R package development, L^AT_EX

PROFESSIONAL MEMBERSHIPS

Royal Statistical Society

RESEARCH INTERESTS

Medical Statistics

Application of ITCs to oncology, endocrinology, and emergency medicine

Model diagnostics for ITC methods

Population adjustment ITC methods

Estimands and target trial emulation

Therapeutic areas

Pancreatic cancer

Endocrinology

Computational Statistics
